Acknowledgment

1. Receipt of the amendment filed 12/03/04 has been acknowledged and entered. The office is withdrawing all objections and rejections in view of the amendment. In addition, paragraph 18 of the specification indicates that by changing the position of the sleeve closer to the center of rotation would reduce the resistance experience by the user, thus, would provide greater propulsion force and minimum displacement.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Claims 1-6 are allowed because the prior art neither shows nor teaches a manual propelled vehicle with all the intricate interconnecting/working structure of the claimed invention.

Claims 7-19 are allowed because the prior art neither shows nor teaches a manual propelled vehicle wherein an auxiliary braking system is actuated by sliding the seat along the frame and in combination with other elements recited.
